Nowadays, coffee is much more than a hot beverage. Talking about coffee is referring to flavors and aromas, which, when fused in our senses, inspire and remind us of life's true great pleasures.

Enjoying a good cup of coffee has become a whole ritual, similar to the appreciation of a fine wine. It has to do with regions, bean selection, but, above all, with the time we set aside to enjoy those moments sharing with others, or simply by ourselves.

This way, every day there are more *connoisseurs* searching for and appreciating the qualities which distinguish good coffee: "A careful selection of beans, whose level of roasting and grinding produce the perfect balance between aroma, flavor and body."
